P R E S S / Event / Workshop

CLAY-hacking at The Danish Ceramic Factory!

We invite you to the factory for a different kind of workshop from the 16th to the 20th of July.

CLAY-hacking. Two days where you get to use our tools and facility to create your own ceramic vision. Our talented ceramicists, Jane and Christina, will guide you through the process of casting ceramics using our archived forms.

The casted pieces will then be broken down for you to hack back together to create a new sculptural form. That is what we call CLAY-hacking!

During the workshop, you will receive an introduction to the fundamentals of casting and restructuring of forms.

Your participation doesn't require any prior knowledge of experience. All you need is a passion for play, developing your craft, and the process of working with sculptural forms.

It's going to be an inspiring week!

2 day workshop Price: 950 DKK/person

We will glaze, burn, and ship the CLAY-hacked pieces to you at the end of the course if you choose.

Price: 100 DKK/ kg

Date:

The workshop is open everyday from the 16th - 20th July from 9:00am-1:00pm

You choose the 2 back to back days that you would like to participate (Mon/Tues - Tues/Wed. - Wed./Thurs. - Thurs./Fri.)

Place:

The Danish Ceramic Factory
Gl. Rønnevej 17A
3730 Nexø

Registration is required by e-mail:
